FALLS CHURCH, VA — The Cold-Formed Steel Engineers Institute (CFSEI) will host a webinar, “Design Aids for Cold-Formed Steel CFSEI Tech Notes” on Thursday, June 27, 2024, from 3:00 p.m. to 4:30 p.m. EDT. This webinar is designed for architects, engineers, building officials and contractors. Participants are eligible for 1.5 professional development hours (PDHs).

In this CFSEI webinar, experts Dr. Roger LaBoube, P.E., Daniel Stadig, P.E., and Jon-Paul Cardin, P.E. will discuss recent updates to 32 CFSEI Technical Notes on cold-formed steel (CFS) members and connections. The updates reflect must-know corrections and changes in the design standards known as AISI S100, North American Specification for the Design of Cold-Formed Steel Structural Members and AISI S240, North American Standard for Cold-Formed Steel Structural Framing.

The presenters will cover: (1) A general review of Tech Note L101-23, Design of Cold-Formed Steel Sheet and Wood Structural Panel Sheathed Shear Walls for Wind and Seismic Forces, (2) A detailed review of Tech Note F104-24, Design of Cold-Formed Steel Bearing Stiffeners, and (3) The new CFSEI Tech Note W601, Design Methodology for Hole Reinforcement of Cold-Formed Steel Compression Members.
More information on the webinar and registration is available at
[https://www.cfsei.org/webinar-on-design-aids-for-cold-formed-steel-cfsei-tech-notes](https://www.cfsei.org/webinar-on-design-aids-for-cold-formed-steel-cfsei-tech-notes).

Dr. Roger A. LaBoube is Curator’s Distinguished Teaching Professor Emeritus of Civil, Architectural and Environmental Engineering and former director of the Wei-Wen Yu Center for Cold-Formed Steel Structures at the Missouri University of Science & Technology.

Daniel Stadig, P.E. is Vice President at Salas O’Brien, a full-service engineering firm serving CFS clients and alike across North America. He is a registered professional engineer with experience designing all conventional systems but has devoted his efforts to CFS framing since 2011.

Jon-Paul Cardin, P.E. is the CEO and founder of The CFSteel Group. He is a licensed professional engineer with over 13 years in the steel construction industry.

The cost of the CFSEI webinar is $75 for CFSEI corporate and professional members, $100 for non-members. It is free for CFSEI student members.

The Cold-Formed Steel Engineers Institute (CFSEI) comprises hundreds of structural engineers and other design professionals who are finding a better way to produce safe and efficient designs for commercial and residential structures with cold-formed steel. CFSEI members work together to develop and evolve industry standards and design methods, produce, and issue technical bulletins, and provide seminars and online training to improve the knowledge and skills base of engineers and design professionals.
